

TELEPORTER SKIPS

As a company we have long been a supplier to the construction industry, ensuring we understand the operations of the industry and what is important to our customers. During the design process of our skips and related products, our team design with the end user in mind. This ensures when our products reach site, there is no complications of use. It is our commitment to quality and innovation which has instilled this culture of care within our design team.

FEATURES AND BENEFITS

- Heavy duty lifting eyes
- Reinforced sides
- Quick hitch options available, JCB, Manitou etc
- Forklift safety pins for transport / unloading
- Ideal for construction waste / offal, or other bulk loads
- Fully seam welded & water tight

MANITOU/JCB ATTACHMENTS

With regard to use of Manitou's or JCB – Bin-Dok also offer both attachments on the teleporter skips. There is no additional lead time for the attachments.

CUSTOM RAL

We also offer custom branding on all skips for Bin-Dok customers – meaning you can have these products sprayed a RAL to match your brand/company colours. The option is also available to have the serial numbers for the skip welded on. Both options are preferences and there is no additional cost for either of these facilities.
