

The Enclosure Range from Bin-Dok

Aesthetics, Design &
Functionality

THE ORIGINS OF THE ENCLOSURE RANGE

The Metropolitan

The Urban

The Bin Enclosure Range from Bin-Dok was originally established when dealing with some of Ireland's Largest Contractors and Developers. Discussions were ongoing regarding the issue of having household bins on display outside the home, many felt it served to take away from the overall aesthetics of the home. This is true, however, household waste bins are obviously an integral aspect of every home so a problem existed that needed a solution and that's where Bin-Dok came in. We spoke to architects, developers, designers and carried out research on what solutions existed currently. Our entire team was involved in the process to ensure we had input from all departments. We knew we needed to create a solution that not only eliminated the problem but that could also add value to a home, that could stand out and be counted as a separate feature of a home.

The solution created was one which combined aesthetics with practicality - a solution which addressed every pain point experienced by the companies who we spoke with throughout the development stage.

The Metropolitan - A closer look

The Bin-Dok Enclosure range was designed to enhance the aesthetic appearance of the home, garden or outside environment. Its aesthetically pleasing furniture finish provides a great way to hide your unsightly wheelie bins, while the built in automatic bin lid opening offers a more hygienic access to waste disposal.

The Bin-Dok Enclosure used pressure treated, stained cedar panels, ensuring an aesthetically pleasing finish. Complemented with a dip galvanized, powder coated frame, this ensures the product will endure all weather conditions for many years to come.

If you are looking for that something extra to bring the finishing touch to your residential development, The Metropolitan, through its combination of style and functionality is the answer.

“

THE PERFECT FINISHING TOUCH
FOR YOUR HOME OR
RESIDENTIAL DEVELOPMENT

“ We knew the enclosure were convenient but it was the aesthetics that really convinced us to get one! ”

The Features and Benefits of the Enclosure Range

The Enclosure Range from Bin-Dok was created not only to solve a problem experienced in so many Irish households, but to create a focal point for new residential developments. The Benefits of the enclosure range include;

Features

- Hot dipped and galvanised finish
- Stained cedar panels
- User friendly gas rams
- Lockable lid for additional security

Benefits

- Protect your household bins from the uncertain Irish weather
- Aesthetically pleasing finish creates a focal point for your home
- Ideal for private or terraced housing with no back garden access
- The Enclosure finish ensures a long lasting solution for home bin storage

“

It's the little things, no more bins blowing away, when I pull in from work the bins aren't the first thing I see!
